SUMMARY

Data & analytics professional with 3+ years building and maintaining data pipelines, reporting solutions, and process automation across telecommunications and consulting sectors. Experienced in SQL Server (T-SQL, stored procedures), ETL pipelines, and dimensional modeling, delivering Power BI / DAX dashboards that support data-driven decisions across commercial teams. Currently deepening the modern analytics stack with dbt — versioned transformations, data quality testing, and documentation. Additional background in backend development (.NET/ASP.NET Core, C#, Node.js) and enterprise system integrations (SAP, CRMs, APIs).

SKILLS

Data & Analytics: SQL Server · T-SQL · Stored Procedures · ETL Pipelines · Dimensional Modeling · Power BI · DAX · Data Quality · dbt (learning)

Databases & Integration: SQL Server · PostgreSQL · Microsoft Dynamics CRM · SAP ERP · ServiceNow · Salesforce

Development & Automation: VBA · Macros · SharePoint · REST APIs · Git · .NET / ASP.NET Core · C# · Node.js · TypeScript

Cloud & Tools: Azure (AI Fundamentals) · SSMS · SQL Agent · Excel · Access

Languages: Portuguese (native) · English (professional)

PROJECTS

Financial Transaction API

ASP.NET Core 8 · C# · JWT · PostgreSQL · Railway · Vercel | github.com/rodhipolito

- REST API for financial transaction management with JWT authentication, service layer, and PostgreSQL persistence.

Taskly – Fullstack Task Manager

ASP.NET Core 8 · React · TypeScript · TailwindCSS · PostgreSQL · CI/CD (GitHub Actions) · Render · Vercel | github.com/rodhipolito

- Fullstack task management application with automated CI/CD pipeline and end-to-end deployment.
-

EXPERIENCE

Technical Specialist – Infrastructure and Data

MEO / Altice Portugal | Mar 2023 – Present | Lisbon, Portugal

- Designed and maintained dimensional data models and Power BI / DAX dashboards, delivering consistent sales analytics across commercial teams and supporting data-driven decision-making.
- Built and maintained ETL pipelines in SQL Server (T-SQL, stored procedures, SQL Agent Jobs), ensuring data consistency, reliability and quality across telecom infrastructure.
- Migrated data pipelines from Access to SQL Server, improving scalability and reducing manual dependency on legacy systems.
- Automated operational data workflows using VBA, Macros and SharePoint, significantly reducing manual effort and improving process efficiency.
- Supported data integration initiatives across enterprise systems, contributing to improved data structure and system scalability.

Software Developer – CRM & Databases

CEDIS, Information and IT Systems Consultants | Dec 2022 – Mar 2023 | Lisbon, Portugal

- Maintained and optimized SQL Server databases using SSMS, performing data corrections, quality checks and troubleshooting to ensure data integrity.
- Provided technical support and customization for Microsoft Dynamics CRM, ensuring data accuracy and system reliability across client organizations.
- Collaborated with sports centers and municipal councils on data accuracy initiatives, supporting consistent reporting and operational continuity.

Software Analyst – Manufacturing Systems (MES)

Johnson & Johnson (AS2 Group) | May 2022 – Nov 2022 | São Paulo, Brazil

- Gathered and analyzed data requirements to support a Manufacturing Execution System (MES) implementation, aligning technical solutions with operational needs.
- Supported automation of manufacturing data flows, ensuring integration between MES and enterprise systems (ERP/APIs).
- Assisted in the configuration and validation of MES environment, contributing to system reliability and data accuracy in a regulated manufacturing context.

Systems Support Analyst – ERP & IT Services

WEG Electronic Equipments | May 2021 – Apr 2022 | São Paulo, Brazil

- Managed and resolved incidents through ServiceNow and Salesforce, ensuring SLA compliance and consistent service delivery across enterprise operations.
- Executed controlled changes in SAP ERP systems (ChaRM process) across DEV and QA environments, contributing to data consistency and system stability.
- Collaborated with technical teams on backlog management and process improvements, supporting operational continuity.

EDUCATION

BSc. Análise e Desenvolvimento de Sistemas (ADS)

Estácio de Sá University | 2022 | Brazil | GPA 3.3
